HIGH-QUALITY STEEL COMPONENTS

Designed, tested, and manufactured with
precision in the USA

ABOUT RAPIDEX FORMING

Founded in 2021, Rapidex Forming sprang from Brooklyn-born fascination with construction—where one floor supporting another sparked a lifelong quest for quality. Today, Rapidex has become the trusted name for anyone who demands dependable, innovative building solutions.

CONTACT US

Whether you're a lumberyard, construction supplier, or merchandiser, Rapidex Forming is here to power your projects with precision-engineered studs and tracks of experts.

Building Quality. Delivering Strength

MADE IN USA

WHAT WE OFFER

The Titan

The Titan is our engineered equivalent (EQ) stud — designed to deliver the same strength and performance as traditional 20-gauge studs, but at a lower cost. By using advanced engineering instead of heavier raw material, The Titan provides contractors with the reliability of a true 20-gauge while maximizing savings on every project.

Metal Studs

Looking for framing that stands the test of time? Our metal studs are crafted to deliver unmatched strength and precision—built to handle the toughest construction demands with ease. Ideal for walls and partitions, they're more than just studs; they're the backbone of reliable builds. With our complete production line ranging from 12 gauge to 25 gauge, we offer the flexibility your projects need—and the confidence you deserve.

Metal Tracks

Strong builds start with the right foundation. Our precision-engineered metal tracks are designed to lock studs securely to floors and ceilings, creating a flawless framework for every structure. From framing openings and sills to headers, these tracks ensure strength and accuracy where it matters most. Supported by our full 12 gauge to 25 gauge production line, they're the choice for builders who won't settle for less than excellence.

WHY CHOOSE US?

Proudly Made in the USA

Manufactured in our U.S.-based facility, delivering quality without compromise.

Speedy Production

Our advanced machinery delivers up to 500 linear feet per minute, ensuring rapid order turnaround.

Exceptional Support

With a team dedicated to service, we're here to back your project success every step of the way.
